Indiana Tax Code - Review

Property Tax

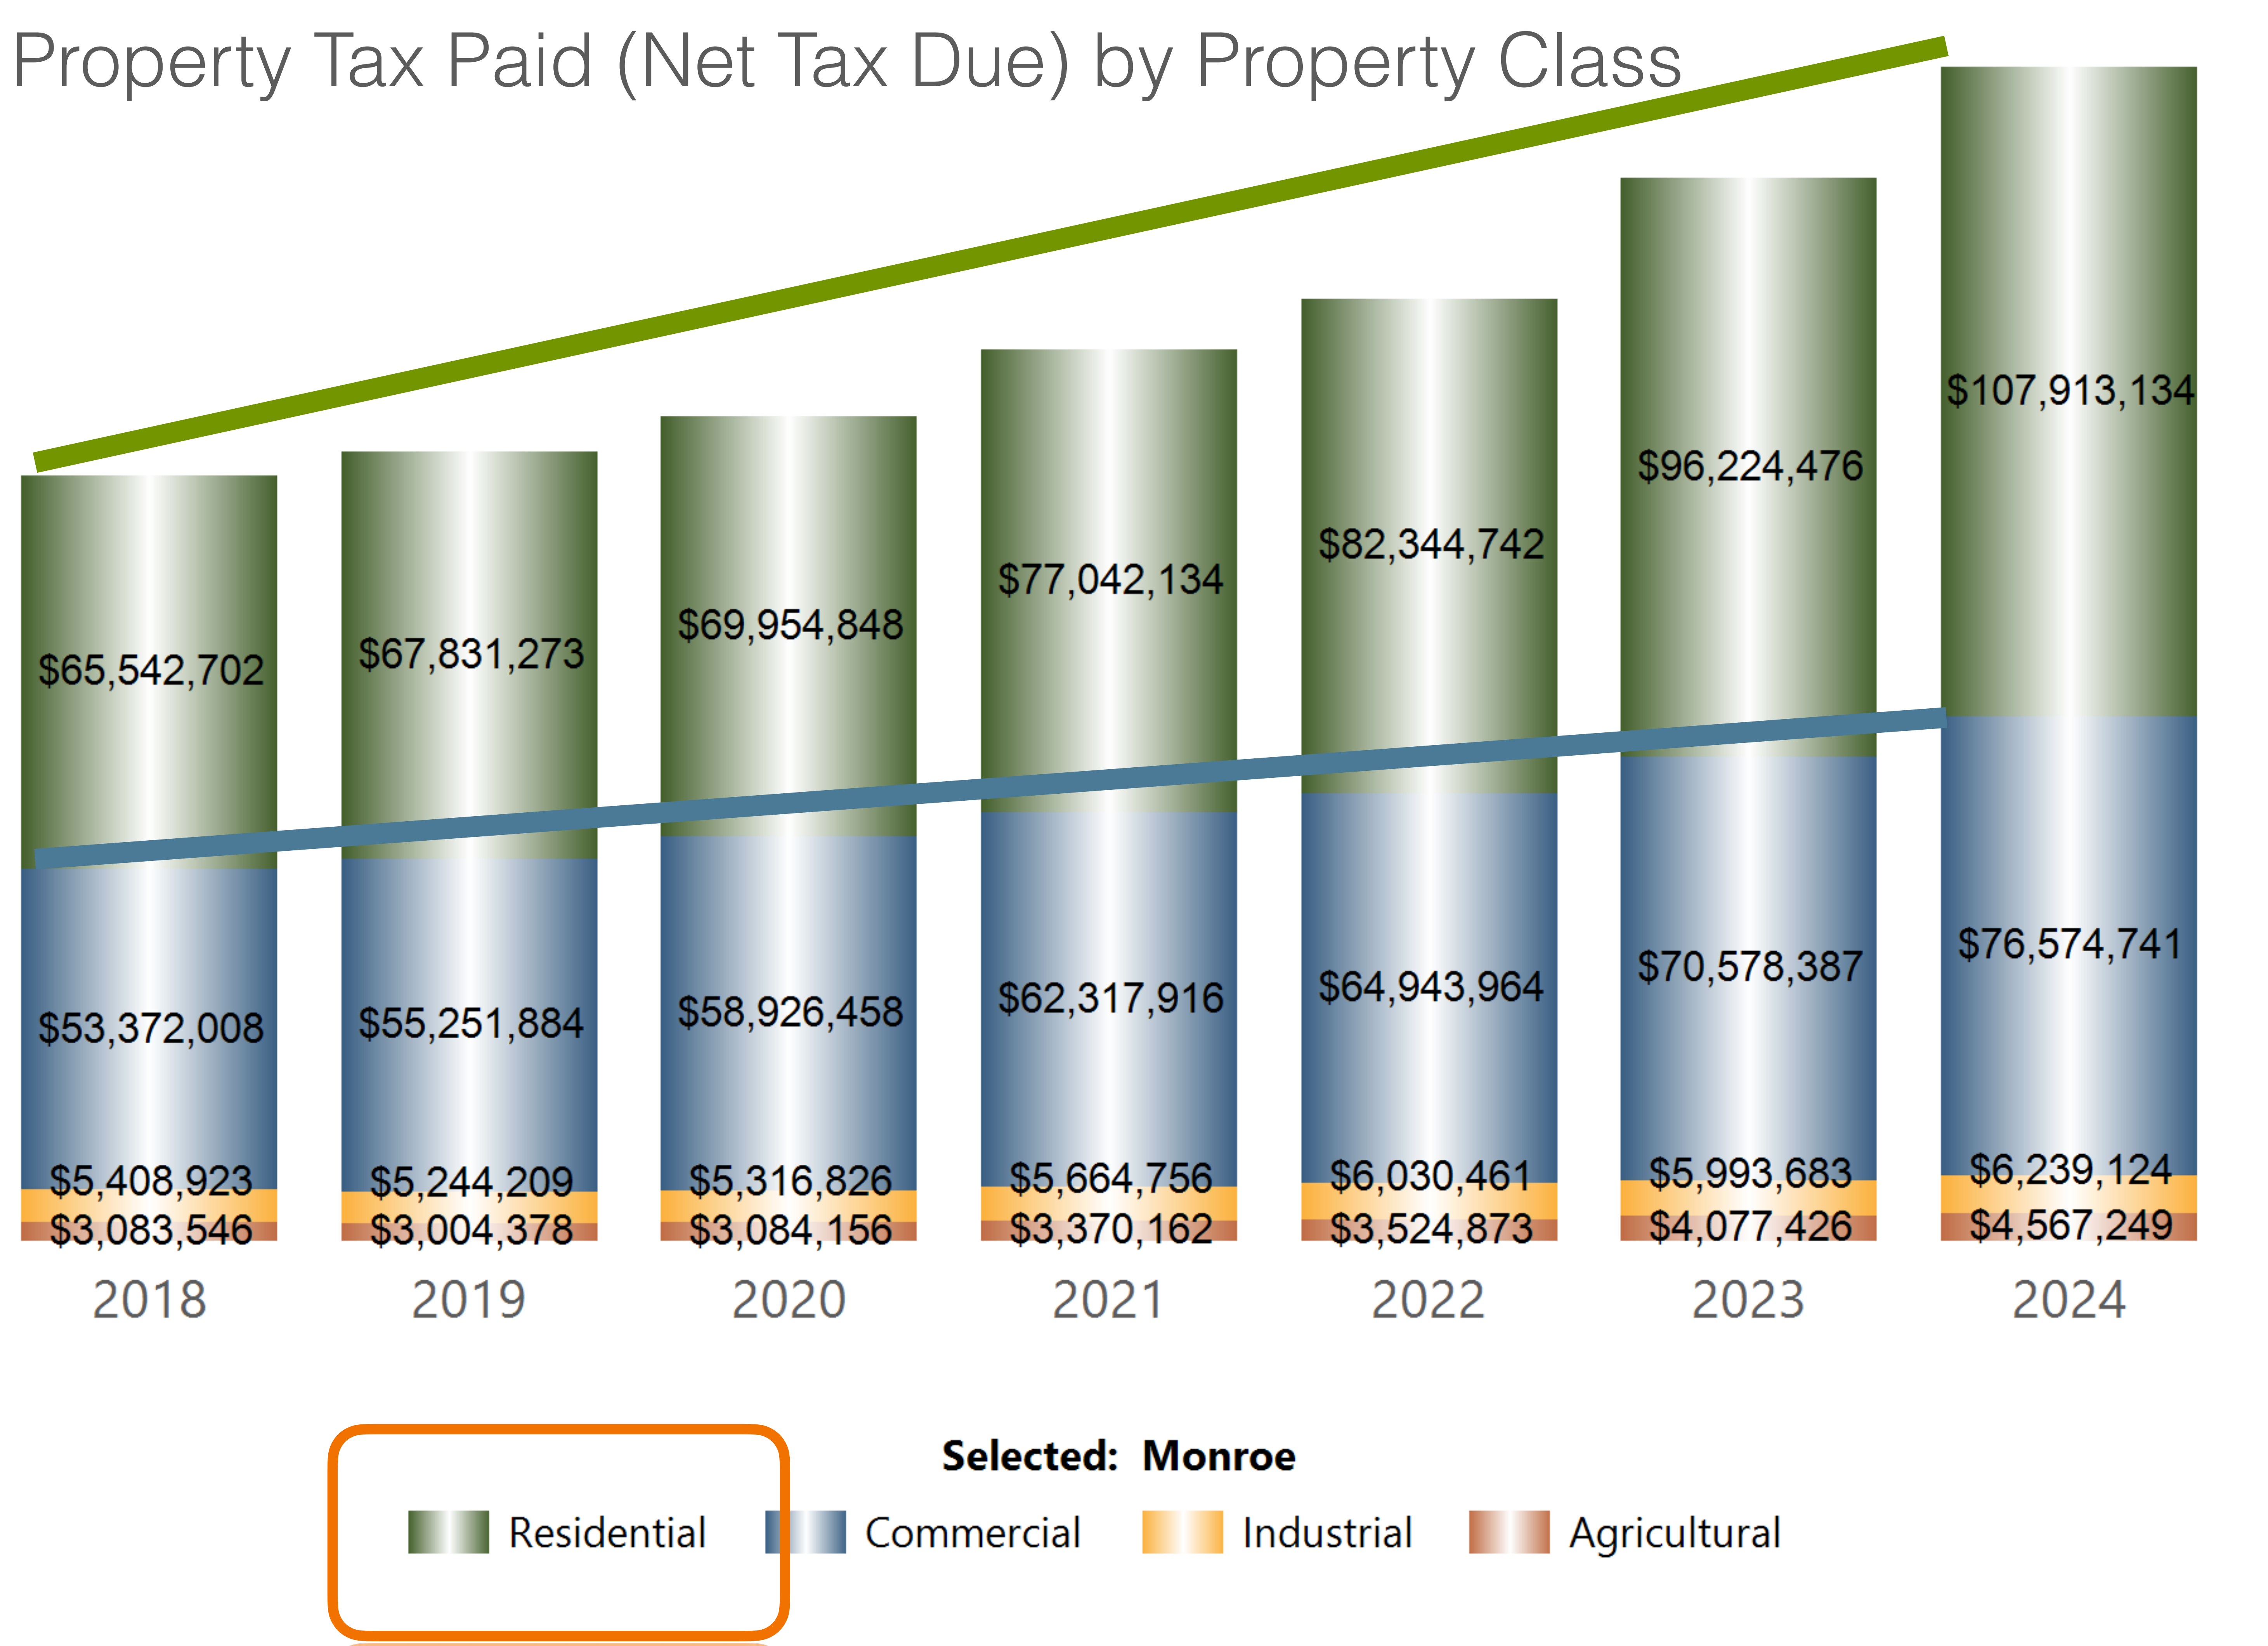
Property taxes are an **ad valorem tax,** meaning that they are allocated to each taxpayer proportionately according to the value of the taxpayer's property.

The property tax process is also known as the **property tax assessment and billing cycle**. This cycle begins with the development of each property's assessed value by the county assessor. The assessor then transfers the data on each property's value to the county auditor. The auditor, after applying deductions, exemptions, and other valuation adjustments, sends these values (known as the certified net assessed values) to the Department of Local Government Finance.

With mass appraisal, **your property is looked at in conjunction with other properties in your area**. Assessors consider (1) age, (2) grade, and (3) condition.

Finally, in a process known as **annual adjustment**, or "trending", each year real property sales data is used to determine if the value of properties in your area should change to match the market value found in the sales of recent properties.

Property Tax Summary Tool



Net assessed value is the gross assessed value minus any number of qualifying exemptions or deductions for taxpayer or property.

Data which the Auditor of **Monroe County** has reported to the State of Indiana

https://gateway.ifionline.org/public/pts/pts-class.aspx

Because Flat rates are bad

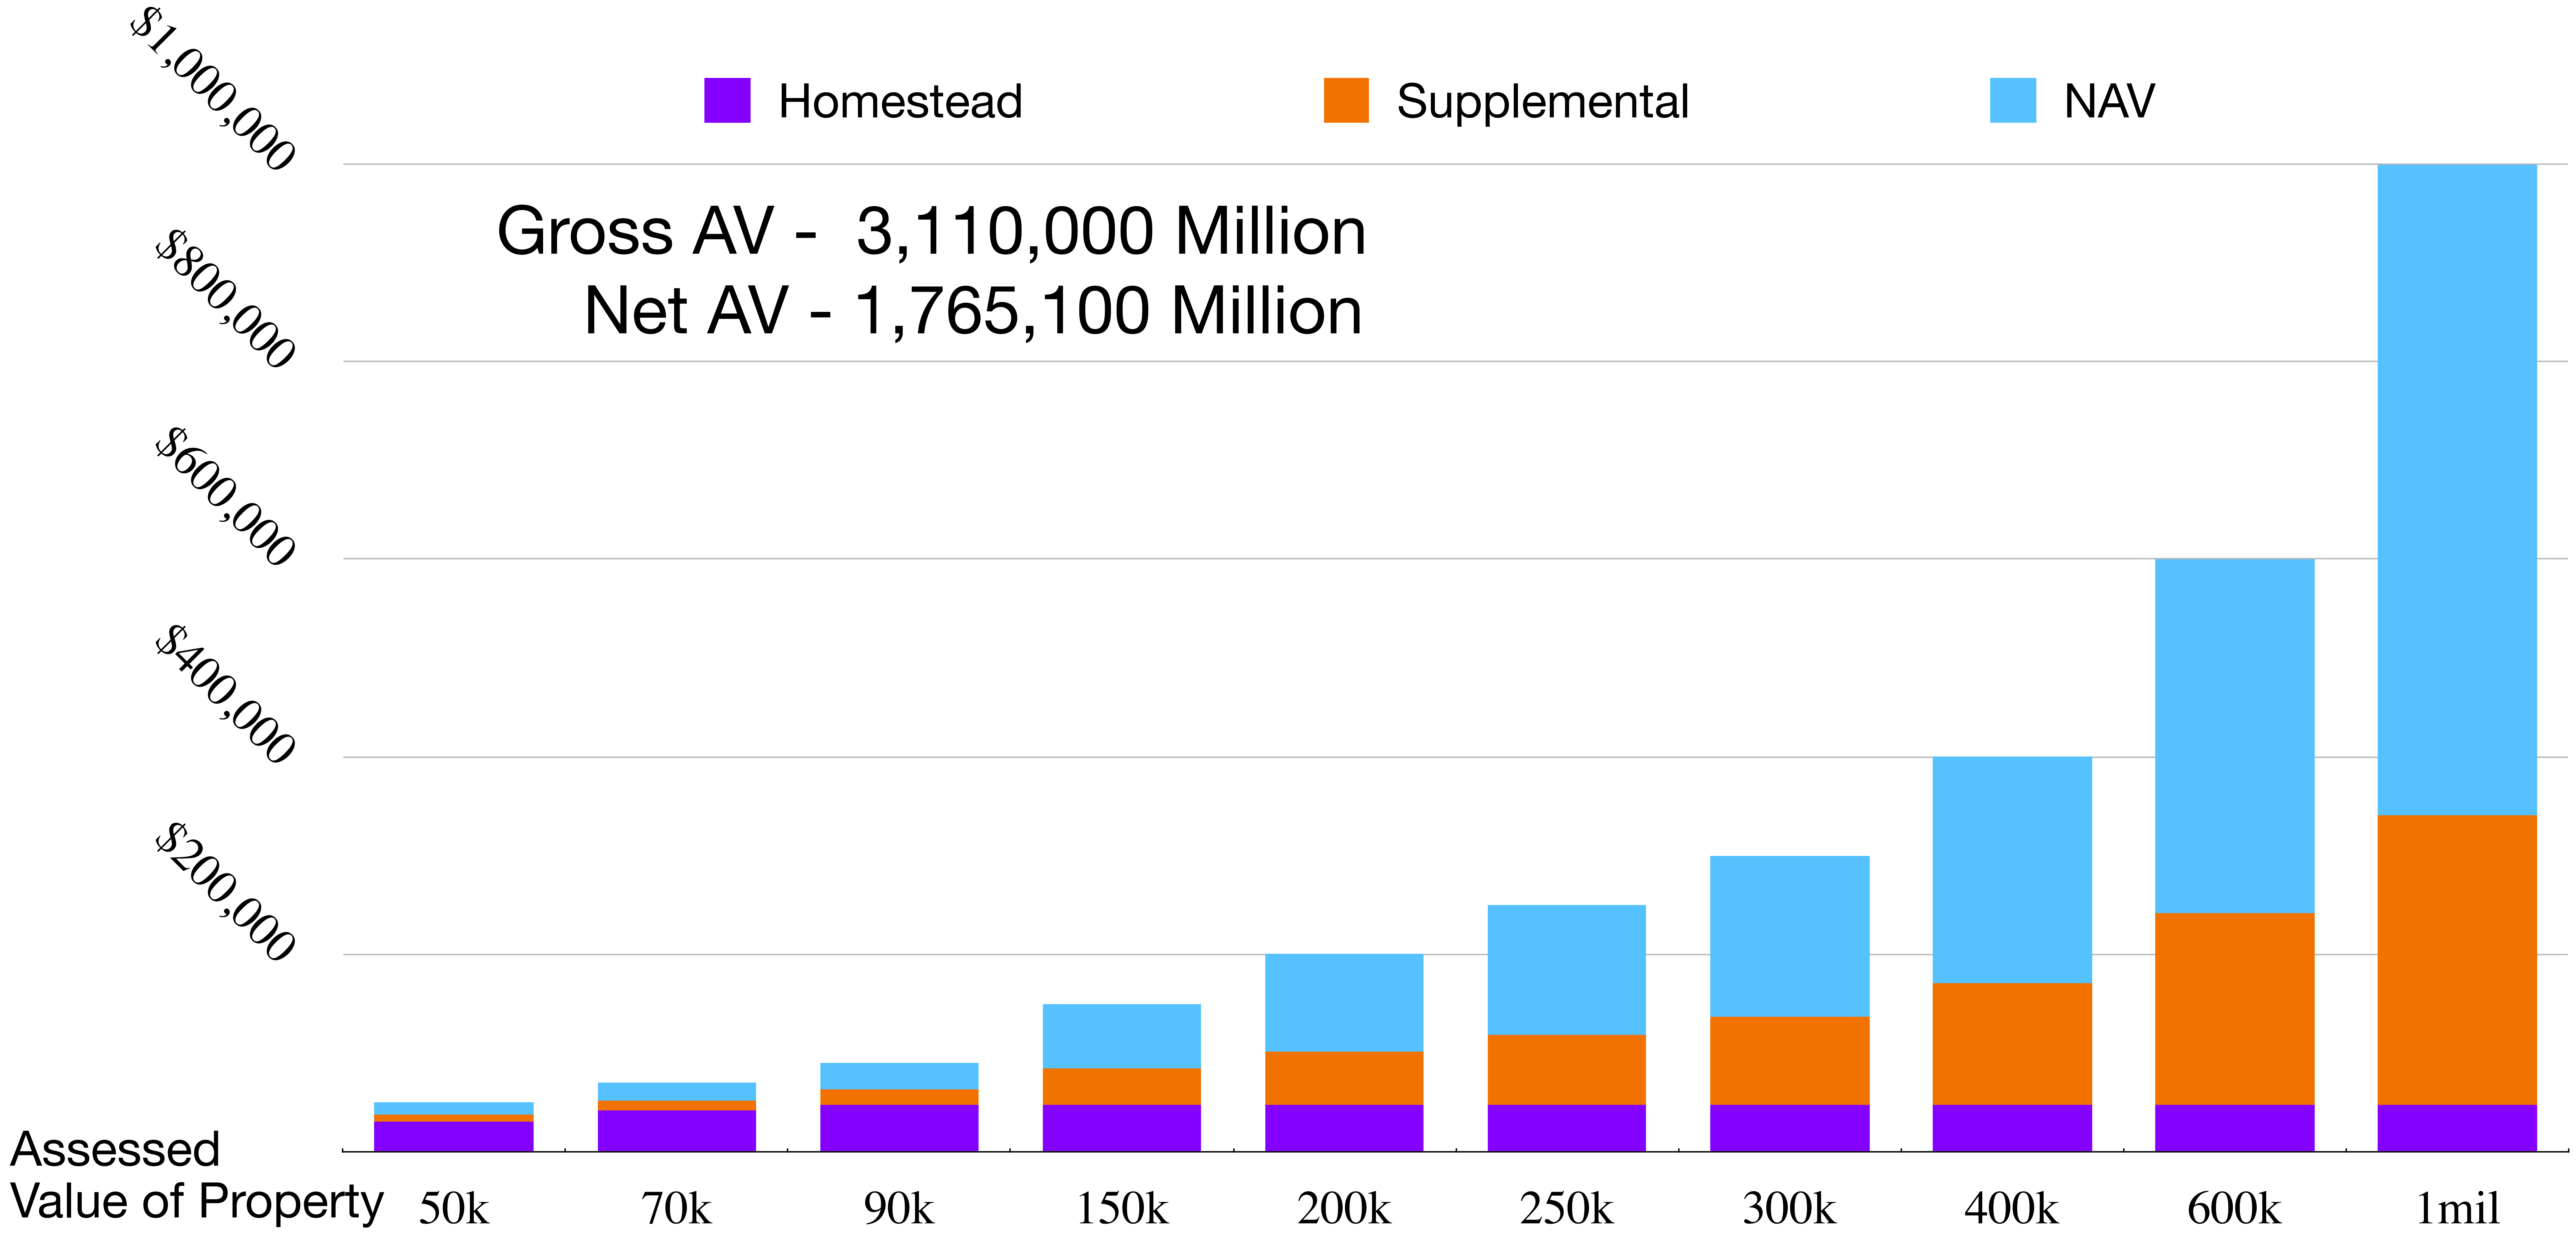
- Exemptions (https://www.in.gov/dlgf/8818.htm)
    - Exemptions involve a **certain type of property**, or the **property of a certain kind of taxpayer**, which is not taxable.
    - Application for exemption must be filed before April 1 of the assessment year with the county assessor.
- Deductions (https://www.in.gov/dlgf/2344.htm)
    - Deductions work by **reducing the amount of assessed value** a taxpayer pays on a given parcel of property.
    - Application for deductions must be completed and dated not later than December 31 annually.

Indiana offers several property tax **exemptions** to reduce taxable assessed value. The most widely used is the homestead standard deduction, allowing homeowners to deduct the lesser of 60% of their property's gross assessed value or $48,000 under Indiana Code 6-1.1-12-37. **This applies only to owner-occupied primary residences.**

Additional relief comes through the supplemental homestead deduction, **reducing net assessed value by 35% for the first $600,000 and 25% for amounts exceeding that.**

Seniors aged 65 and older with an income below $40,000 for individuals or $50,000 for married couples may qualify for an exemption if their home's assessed value does not exceed $240,000 under Indiana Code 6-1.1-12-9.

Deductions reduce the NAV, sample graphic of 10 properties



Supplemental deduction amount is based on property assessed value %35 <$600k and %25>$600k

Tax Bill – Gross Tax Liability

- A taxpayer's gross liability is a simple formula:

Net AV	Times	Taxing District Rate

- The taxing district rate is comprised of the overlapping taxing unit rates, this formula can also be expressed as:

Net AV	Times	County Unit Rate
Net AV	Times	School Unit Rate
Net AV	Times	Township Unit Rate
Net AV	Times	City/Town Unit Rate
Net AV	Times	Library Unit Rate

* The tax rate is to be divided by 100

Circuit Breaker = Property TAX CAPS = credits

The General Assembly shall (Article 10 Indiana Constitution) limit a taxpayer's property tax liability.

The circuit breaker, or property tax caps, represent the **maximum tax bill that an individual can pay**.

The circuit breaker credit, an amount applied to a qualifying tax bill that prevents a taxpayer from exceeding the property tax cap.

Where exemptions and deductions reduce the taxable AV, **tax bill credits reduces the Gross Tax Liability directly.**

After calculating the Gross Tax Liability, there are three specific **credits** that are applied to the tax bill.

4A) Local Income Tax – Property Tax Relief Credit

4B) Circuit Breaker Credit

4C) Over 65 Circuit Breaker Credit

The amount of the credit (IC 6-1.1-20.6-7.5) is the amount by which the **person's** property tax liability attributable to the person's:

(1) homestead exceeds one percent (1%);

(2) residential property exceeds two percent (2%);

(3) long term care property exceeds two percent (2%);

(4) agricultural land exceeds two percent (2%);

(5) nonresidential real property exceeds three percent (3%);

(6) personal property exceeds three percent (3%); **of the gross assessed value of the property that is the basis for determination of property taxes for that calendar year**.

Tax Bill 101 – CB Cap Calculation

	Homestead Property (1% Cap)	Agricultural Land (2%)	Non Residential Real Estate (3%)
Gross AV	100,000	100,000	100,000
Net AV	Not Needed for the Calculation	Not Needed for the Calculation	Not Needed for the Calculation
Tax Rate	Not Needed for the Calculation	Not Needed for the Calculation	Not Needed for the Calculation
Gross Liability	Not Needed for the Calculation	Not Needed for the Calculation	Not Needed for the Calculation
Property Tax Cap	$1,000 = 100,000 * .01	$2,000 = 100,000 * .02	$3,000 = 100,000 * .03

In order to calculate the property tax cap, the gross assessed value is multiplied by 1%, 2%, or 3% based on property type. The net AV, tax rate, and gross liability are not factored into the calculation of the cap, but they will factor into the calculation of the credit.
